

Dear Parents,

The district is experiencing some difficulties with our e-mail system. Our IT department is looking into the issues and working on resolving them quickly. Below is an important e-mail that was sent yesterday afternoon regarding the Evening Expo and Science Fair. Please note: projects can be picked up tonight from 6-8pm or tomorrow from 7:30am-6:00pm.

We will use paper to communicate until the e-mail issue is fully resolved.

Dear Miller Avenue Families,

I understand that there is some disappointment about the cancellation of the Evening Expo and Science Fair. In anticipation of the inclement weather, I spoke with members of the PTO board yesterday to try to find an alternative. There are several district events in the coming week which prevent us from rescheduling. The Science Fair is set up in the All Purpose Room and Whittle Gym is set up in the Gym. Both of these rooms are scheduled to be used for other activities, also impacting our ability to have them remain in place for an extended period of time. The Whittle Gym unit ends on Friday and the equipment will be picked up and removed from Miller Avenue so that our PE staff can move on to the next unit in the curriculum.

These are some of the upcoming events taking place in the next week:

- Thursday, March 8th Evening Parent Teacher Conferences @ Miller Avenue 6-8pm
- Friday, March 9th Parents Night Out @ Willow Creek Golf Course 7pm
- Monday, March 12th SEPTA Meeting @ HS Library 7pm
- Tuesday, March 13th BOE Meeting @ HS Library 7pm
- Wednesday, March 14th PTA/PTO Council @ HS Library 7pm
- Thursday, March 15th School Closed for students

If you would like to see the science projects, you are welcome to visit the AP Room during the school day tomorrow or during the evening from 6-8pm.

We understand that this is an event many of our students and their families were looking forward to and we are all disappointed. Fortunately, the students were able to share their projects and enjoy the Science Fair today with their class. Ask them about some of the great projects they saw today!

Stay safe and warm!

Sincerely,
Christine Carlson, Principal
